CONSIGNES GENERALES DE SECURITE

- Ne pas utiliser la clôture comme un garde-corps.
- Ne pas enjambrer le portail ou la clôture.
- Ne pas mettre intentionnellement tout ou une partie des membres supérieurs ou inférieurs entre les espaces libres du portail ou de la clôture.

PRECONISATIONS D'ENTRETIEN

- La clôture doit être nettoyée au moins une fois par an avec de l'eau douce et savonneuse, sans détergent agressif ou moyens abrasif. Le rinçage se fera uniquement à l'eau (nettoyeur haute pression prohibé). Ce nettoyage a pour objet de débarrasser la clôture de toutes substances amenées par l'environnement et tendant à la dégrader (pollution, sel, etc.).
- Il est conseillé d'augmenter la fréquence de ces entretiens dans des sites très exposés (bord de mer par exemple).

Pour tous autres problèmes, contacter immédiatement un professionnel.
